                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                RESULT 34

US-10-287-949A-9242/c

Sequence 9242, Application US/10287949A

Sequence 9242, Application US/10287949A

Publication No. US20040102389A1

GENERAL INFORMATION:

APPLICANT: Ribozywe Pharmaceuticals, Inc.

APPLICANT: Ribozywe Pharmaceuticals, Inc.

APPLICANT: Ribozywe Pharmaceuticals, Inc.

APPLICANT: Stanchcomb, Dam

APPLICANT: Stanchcomb, Dam

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

CURRENT FILLING DATE: 2003-04-11

NUMBER OF SEQ ID NOS: 20822

SOFTWARE: PatentIn version 3.0

SEQ ID NO 9242

i Sequence 715, Application US/09504231A

patent No. US20020013458A1

GENERAL INFORMATION:

APPLICANT: Blatt, Laweence

APPLICANT: Roberts, Beth

APPLICANT: Roberts, Beth

APPLICANT: Pacco, Panela

APPLICANT: NUMBER: 06/100, 842

PRIOR PILING DATE: 1998-09-18

PRIOR APPLICANT: NUMBER: 60/100, 842

PRIOR APPLICANT: Pacco, Panela

APPLICANT: Pacco, Pacco, Panela

APPLICANT: Pacco, Pacco, Panela

APPLICANT: Pacco, Pac
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 716, Application US/09504231A
Patent No. US20020013458A1
Patent No. US20020013458A1
Patent No. US20020013458A1
APPLICANT: Blatt, Lawrence
APPLICANT: Roberts, Beth
APPLICANT: Roberts, Beth
APPLICANT: Roberts, Deth
APPLICANT: Paveo, Memala
APPLICANT: Paveo, Pennis
TITLE OF INVENTION: ENZYMATIC NUCLEIC ACID TREATMENT OF DISEASES OR CONDITIONS RELATER
TITLE OF INVENTION: HEPATITIS C VIRUS INFECTION
FILE REPERENCE: Pp. 247/282
CURRENT APPLICATION NUMBER: US/09/504,231A
CURRENT FILING DATE: 2000-02-15
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ; TYPE: RNA
